

5th Annual GSH/SEG Web Symposium on 3D seismic survey design

The Energy Transition

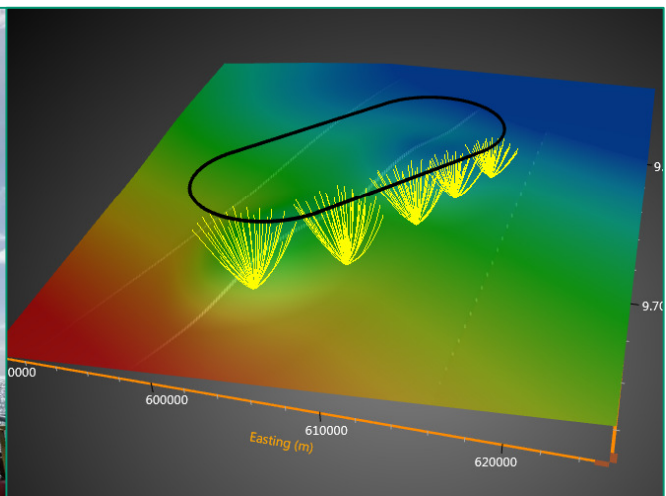

Geophysics continues to play a critical role in oil and gas exploration and production, but is now increasingly being used in geothermal and carbon sequestration projects as well as site surveys for offshore wind construction. How is our industry adapting to these new and continuing challenges ?

Wednesday December 6th 2023
9:00 am to 1:00 pm (CST)

Registration

General public	\$125
GSH/SEG Members	\$ 90
Students	\$ 25

Who should attend ? : Geoscientists, technical managers and field operation specialists seeking to remain current with the latest technology developments..

Speakers

This informal and interactive event will feature presentations by David Wilson, Brandon Mattox, Peter Duncan and other leading industry thinkers.

Visit gshtx.org, Events Tab to register and see full presenter information (when available)
